

**SURFLEX**

**2024**

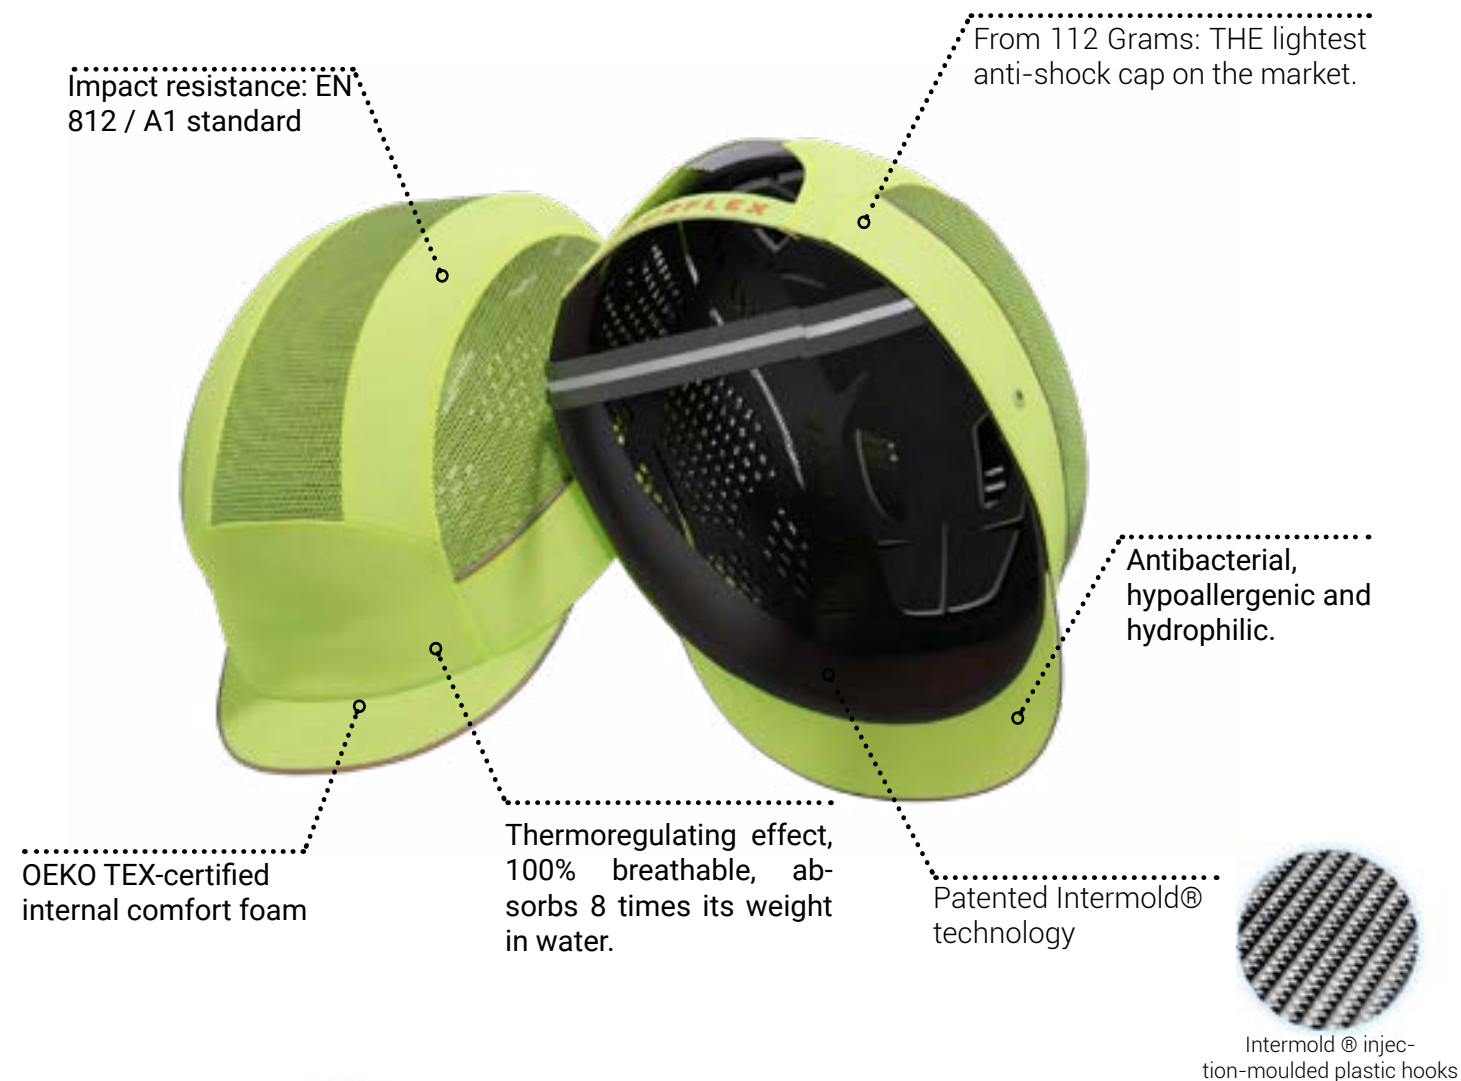

**SPECIALIST IN  
HEAD  
PROTECTION  
SINCE 1993**

## Surflex launches its **new French-made protective shell** for the **AIR STREAM** and **ECO** ranges.

**Relocation of part of production to France**

**French industrial know-how**

**Guaranteed quality and traceability**

**Reducing environmental impact**

## About us

Since its creation in 1993, Victoire et Compagnie has forged its reputation as a family business specializing in standardized protective caps under the Surflex brand.

Our commitment to the safety and comfort of our users is at the heart of our mission.

We combine tradition and innovation to design state-of-the-art caps that meet the highest standards. Our dedicated team is constantly on the lookout for new developments and improvements. Customer satisfaction is our priority, and we strive to provide reliable, stylish head protection for all.

Our future corporate vision is guided by innovation and sustainability. By incorporating cutting-edge technologies and reducing our environmental impact, we promote prosperous growth while remaining socially responsible and maintaining a high level of quality.

Constance LALOY and Thomas Delsalle

## Expert know-how for 30 years with strong values:

### FLEXIBILITY

Adapt to the maximum to offer a personalized solution to each customer.

### REACTIVITY

Organize for you respond as quickly and qualitatively as possible.

### INNOVATION

Our priority: seek innovation, ideas and innovations.

### PROXIMITY

A family business that listens to its customers and employees.

# THE STANDARD EN 812: 2012/ A1

La norme EN 812 est une norme européenne visant à garantir une protection de la tête du porteur d'un EPI. De cette façon, elle concerne les casquettes de sécurité pour l'industrie.

**SURFLEX®**  
PROTECTION MANUFACTURER

## Is the same protective shell used for each cap ?

No, only the AIR STREAM and ECO ranges use the SCARAP 5 shell, which is made in France. The other caps are equipped with the SCARAP 2 shell. The winter hat range contains a different shell from the others.

## What is the difference between EN 397 and EN 812 ?

The EN 397 standard concerns protective helmets for industry according to the criteria of absorption, shock, chin strap anchoring and ventilation. The helmet must resist an object projected on the skull.

The EN 812 standard is for safety caps with an anti-shock cap. It is intended to provide protection for workers during a shock between the head and hard, immobile objects causing superficial cuts and injuries.

## Are the Surfex anti-shock caps all standardized ?

The entire Surfex® range has a removable protective shell certified by EN 812.

## What is the lifespan of the protective caps ?

ABS life: 3 years.

Like all personal protective equipment, when visual wear or deterioration is observed by the user, the cap must be immediately replaced, whether it is 10 days, 6 months, or 3 years old.

## Can an anti-shock cap replace a helmet ?

No, the anti-shock cap does not replace the helmet, they do not have the same functions.

## Which professionals are concerned by the wearing of anti-shock caps ?

Workers who work in hazardous work environments. PPE conforming to the EN 812 standard is designed in particular for the construction industry, the industrial sector, the food industry, maintenance workers, plumbers, personnel in the field of car repair or DIY.

Recycled polyester

## ECO RECYCLE 5 CM

**New 2022, to contribute to the CSR development of companies.**

Standard protective cap EN 812: 212, laser side vents | Resistant and soft-touch material | Absorbent strip for perspiration | Adjustable one size | Mixed model | Standard visor (5 cm).

Material :

100 % rPET (Polyester Recyclé)

## What is the rPET ?

rPET «Recycled ethylene polyterephthalate» is an eco-friendly material aiming to quickly reduce the impact on the climate by transforming household waste into a deposit of raw materials for the textile industry.

Mainly from the recycling of water bottles, it is commonly called recycled polyester in the textile field.
